Fund Performance Against Benchmark

A benchmark is a standard by which the performance of a fund is compared to. Since your investment is for medium to long-term, it's important to look at a benchmark's performance over a longer period of time to see and appreciate long-term volatility and progression.

Benchmark Table

A benchmark is a standard against which the performance of a fund/portfolio that can be measured.

Aug 31 2000 to Oct 31 2024

Tracking Error Table

Tracking error is the difference between a portfolio return and the benchmark return.

	1 Month Ago	3 Months Ago	1 Year	3 Years Ago	5 Years Ago	Since Inception - Cumulative
Benchmark	-0.25%	1.09%	5.40%	n.a Annualized	n.a Annualized	6.47% Annualized
Tracking Error	-0.31%	0.23%	0.99%	n.a	n.a	0.90%

The tracking error shows how well the fund has been able to mimic the performance of the benchmark. In other words if the tracking error is zero the returns of the fund are equal to the return of the benchmark. In case the tracking error is positive the fund did better than the benchmark, if negative it performed worse. The fund manager tries to maintain a performance that is within a small margin of the benchmark to ensure risk and return of the fund and benchmark are equal.
