

Peso Growth Fund

The fund is designed to attract, generate and mobilize Peso-denominated investible funds so as to provide investors a vehicle for the accumulation of such Peso-denominated capital contributed thereto through the purchase of units in the Fund. The Fund aims to achieve long term growth by diversifying mainly into select equity investments listed in the Philippine Stock Exchange, and other marketable instruments.

8 AYALA CORPORATION	Equity	5%
9 JOLLIBEE FOODS CORPORATION	Equity	4%
10 MANILA ELECTRIC COMPANY	Equity	3%

Asset Allocation Chart

This shows which asset composition your fund is currently invested in.

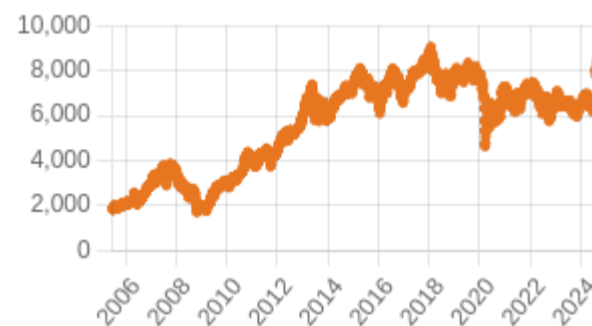

Fund Performance Against Benchmark

A benchmark is a standard by which the performance of a fund is compared to. Since your investment is for medium to long-term, it's important to look at a benchmark's performance over a longer period of time to see and appreciate long-term volatility and progression.

Benchmark Table

A benchmark is a standard against which the performance of a fund is compared.

Jul 01 2005 to Oct 30 2024

Tracking Error Table

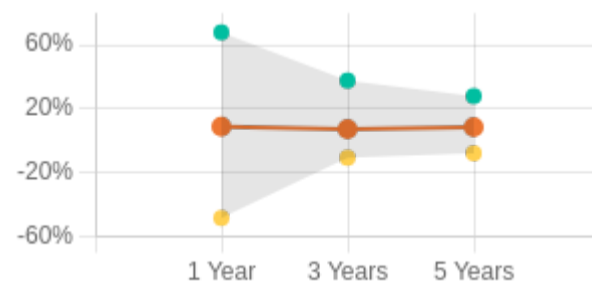

Tracking error is the difference between a portfolio's return and the benchmark return.

	1 Month Ago Sep 30, 2024 - October 31, 2024	3 Months Ago Jul 31, 2024 - Oct 31, 2024	1 Year Ago Oct 31, 2023 - Oct 31, 2024	3 Years Ago Oct 29, 2021 - Oct 31, 2024	5 Years Ago	Since Inception Jan 23, 2015 - Oct 31, 2024
Benchmark	-1.97%	7.36%	17.37%	-1.82% Annualized	-4.62% Annualized	-2.76% Annualized
Tracking Error	0.34%	1.26%	4.97%	4.87%	0.42%	

The tracking error shows how well the fund has been able to mimic the performance of the benchmark. In other words, if the tracking error is zero, the returns of the fund are equal to the return of the benchmark. In case the tracking error is positive, the fund did better than the benchmark; if negative, it performed worse. The fund manager tries to maintain a performance that is within a small margin of the benchmark to ensure risk and return of the fund and benchmark are equal.

Long-term Volatility of Benchmark Performance

This chart shows the annual, three-year, and five-year benchmark volatility in the past 10 years and beyond. The graph shows the lowest, highest, and average historical annual returns. It includes periods where there were major financial events such as the global financial crisis 2007-2008 so as to show how strong economic fundamentals help markets recover. Looking at the graph, long-term investing will keep your volatility low, moving you closer to the average return.

	1 Year	3 Years	5 Years
HIGHEST	68.02%	37.79%	27.97%
AVERAGE	9.01%	7.41%	8.55%
LOWEST	-48.29%	-10.47%	-7.69%
