10	BSP BILL 2023	2023	4.10%

Asset Allocation Chart

This shows which asset composition your fund is currently invested in.

Fund Performance Against Benchmark

A benchmark is a standard by which the performance of a fund is compared to. Since your investment is for medium to long-term, it's important to look at a benchmark's performance over a longer period of time to see and appreciate long-term volatility and progression.

Benchmark Table

A benchmark is a standard against which the performance of a fund is compared.

Aug 01 2018 to Oct 31 2023

Tracking Difference Table

Tracking error is the difference between a portfolio's return and the benchmark return.

	1 Month Ago Sep 29, 2023 - October 31, 2023	3 Months Ago Jul 31, 2023 - Oct 31, 2023	Since Inception Jun 16, 2023 - Oct 31, 2023
Benchmark	0.27%	0.99%	4.84% Annualized
Tracking Error	0.00%	0.00%	-0.84%

The tracking difference shows how well the fund has been able to mimic the performance of the benchmark. In other words, if the tracking error is zero, the returns of the fund are equal to the return the benchmark. In case the tracking error is positive, the fund did better than the benchmark; if negative, it performed worse. The fund manager tries to maintain a performance that is within a small margin of the benchmark to ensure risk and return of the fund and benchmark are equal.
